MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 244

NUMBER 1, JANUARY 1986

COMMUNICATIONS

- Correlation between Bilayer Destabilization and Activity Enhancement by Diacylglycerols in Reconstituted Ca-ATPase Vesicles
Kwan-Hon Cheng and Sek Wen Hui 382
- Carbon Tetrachloride and 2-Isopropyl-4-pentenamide-Induced Inactivation of Cytochrome *P*-450 Leads to Heme-Derived Protein Adducts
Helen W. Davies, Steven G. Britt, and Lance R. Pohl 387

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

- Iron and Xanthine Oxidase Catalyze Formation of an Oxidant Species Distinguishable from OH $\cdot$: Comparison with the Haber-Weiss Reaction
Christine C. Winterbourn and Harry C. Sutton 27
- Interaction of the Extrinsic Potential-Sensitive Molecular Probe diS-C $_3$ -(5) with Pigeon Heart Mitochondria under Equilibrium and Time-Resolved Conditions
B. P. Bammel, J. A. Brand, W. Germon, and J. C. Smith 67
- Functional Characterization of the Uncoupler-Insensitive Na $^+$ Pump of the Halotolerant Bacterium, Ba $_1$
Shifra Ken-Dror, Ronit Preger, and Yoram Avi-Dor 122
- Hydroxyl Radical Formation as a Result of the Interaction between Primaquine and Reduced Pyridine Nucleotides. Catalysis by Hemoglobin and Microsomes
Ohara Augusto, Carmen L. V. Weingrill, Shirley Schreier, and Helika Amemiya 147
- In Vivo* Spin Trapping of Free Radicals Generated in Brain, Spleen, and Liver during γ Radiation of Mice
Edward K. Lai, Carol Crossley, Rajagopalan Sridhar, Hara P. Misra, Edward G. Janzen, and Paul B. McCay 156
- Cyanide- and Carbon Monoxide-Resistant Mutants of *Vitreoscilla*: Altered Cytochromes and Respiratory Properties
Winifred Tamura-Lis and Dale A. Webster 285
- Chemical Crosslinking of α Subunits in the F $_1$ Adenosine Triphosphatase of *Escherichia coli*
Philip D. Bragg and Cynthia Hou 361

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

- The ^{18}O Isotope Effect in ^{13}C Nuclear Magnetic Resonance Spectroscopy: Mechanistic Studies on Asparaginase from *Escherichia coli*
Klaus H. Röhm and Robert L. Van Etten 128
- Biosynthesis of Retinoyl- β -glucuronide, a Biologically Active Metabolite of All-*trans*-retinoic Acid
Duncan A. Miller and Hector F. DeLuca 179
- Carbonyl Reductase of Dog Liver: Purification, Properties, and Kinetic Mechanism
Akira Hara, Toshihiro Nakayama, Yoshihiro Deyashiki, Kinya Kariya, and Hideo Sawada 238

The Critical Micelle Concentration of Some Physiologically Important Fatty Acyl-Coenzyme A's as a Function of Chain Length

Robert H. Smith and Gary L. Powell 357

LIPIDS AND PROSTAGLANDINS

Lipolytic Degradation of Human Very Low Density Lipoproteins by Human Milk Lipoprotein Lipase: The Identification of Lipoprotein B as the Main Lipoprotein Degradation Product

Peter Alaupovic, Chi-Sun Wang,
Walter J. McConathy, Dieter Weiser, and Deborah Downs 226

Substrate Specificities of Lipases from Corn and Other Seeds

Y. H. Lin, Charles Yu, and Anthony H. C. Huang 346

MEMBRANES, CELL SURFACES, AND RECEPTORS

Lectin Binding Studies on Murine Peritoneal Cells: Physicochemical Characterization of the Binding of Lectins from *Datura stramonium*, *Evonymus europaea*, and *Griffonia simplicifolia* to Murine Peritoneal Cells

Jerzy Petryniak, Thomas K. Huard, Gerald D. Nordblom, and Irwin J. Goldstein 57

Kinetic Properties of the Insulin Receptor Tyrosine Protein Kinase: Activation through an Insulin-Stimulated Tyrosine-Specific, Intramolecular Autophosphorylation

Yan C. Kwok, Raphael A. Nemenoff, Alvin C. Powers, and Joseph Avruch 102

The Phosphoproteins of the Sick Erythrocyte Membrane

Robert M. Johnson, James K. Dzandu, and James A. Warth 202

Phorbol Diester Treatment Promotes Enhanced Adenylate Cyclase Activity in Frog Erythrocytes

David R. Sibley, Roger A. Jeffs,
Kiefer Daniel, Ponnal Nambi, and Robert J. Lefkowitz 373

MOLECULAR GENETICS, DEVELOPMENTAL BIOCHEMISTRY, AND DIFFERENTIATION

Absence of Histone H2B in Nucleosomes Containing Histone TH2B and Interaction of Immunoglobulin with Nucleosomes

Marie L. Chiu and J. Logan Irvin 42

Characterization of Selenium-Containing tRNA^{Glu} from *Clostridium sticklandii*

Wei-Mei Ching 137

Noncoordinate Regulation of the mRNAs Encoding Cytochromes P-450_{BNF/MC-B}

and P-450_{ISF/BNF-G} John B. Fagan, Jullia V. Pastewka, Stephen C. Chalberg,

Engin Gozukara, F. Peter Guengerich, and Harry V. Gelboin 261

OXYGENASES, MICROSOMES, AND P-450 REACTIONS

The Primary Structure of Cytochrome P-450d Purified from Rat Liver Microsomes: Prediction of Helical Regions and Domain Analysis

Mitsuru Haniu, Dene E. Ryan, Wayne Levin, and John E. Shively 323

PHYSICAL BIOCHEMISTRY

Spatial Relationship between the Intrinsic Metal in the β Subunit and Cysteine-132 in the σ Subunit of *Escherichia coli* RNA Polymerase: A Resonance Energy Transfer Study

Dipankar Chatterji, Cheng-Wen Wu, and Felicia Y.-H. Wu 218

Spectroscopic Properties of Bilirubin-Human Serum Albumin Complexes: A Stoichiometric Analysis	
<i>Aage Knudsen, Anders Overgaard Pedersen, and Rolf Brodersen</i>	273

PLANT BIOCHEMISTRY AND PHOTOSYNTHESIS

Enzyme Regulation in C ₄ Photosynthesis: Purification, Properties, and Activities of Thioredoxins from C ₄ and C ₃ Plants	
<i>Nancy A. Crawford, Boihon C. Yee, Steven W. Hutcheson, Ricardo A. Wolosiuk, and Bob B. Buchanan</i>	1
An Isocitrate Lyase of Higher Plants: Analysis and Comparison of Some Molecular Properties	
<i>Giancarlo Pinzauti, Eugenio Giachetti, Guido Camici, Giampaolo Manao, Gianni Cappugi, and Paolo Vanni</i>	85
Purification and Partial Sequence of the M _r 10,000 Phosphoprotein from Spinach Thylakoids	
<i>J. Farchaus and R. A. Dilley</i>	94
Overproduction of 5-Enolpyruvylshikimate-3-phosphate Synthase in a Glyphosate-Tolerant <i>Petunia hybrida</i> Cell Line	
<i>Hans C. Steinrücken, Arno Schulz, Nikolaus Amrhein, Clark A. Porter, and Robert T. Fraley</i>	169
Physiological Requirement for Biosynthesis of Multiple 24 β -Methyl Sterols in <i>Gibberella fujikuroi</i>	
<i>W. David Nes and Rick C. Heupel</i>	211
Isolation of an Intrinsic Antenna Chlorophyll <i>a</i> -Protein from the Photosystem I Reaction Center Complex of the Thermophilic Cyanobacterium <i>Synechococcus</i> sp.	
<i>Kintake Sonoike and Sakae Katoh</i>	254

PROTEIN STRUCTURE AND FUNCTION

Structural Characterization of Adrenal Chromogranin A and Parathyroid Secretory Protein-I as Homologs	
<i>James W. Hamilton, Luke L. H. Chu, James B. Rouse, Karen Reddig, and Ronal R. MacGregor</i>	16
Hybridization between Fructose Diphosphate Aldolase Subunits Derived from Diverse Biological Systems: Anomalous Hybridization Behavior of Some Aldolase Subunit Types	
<i>Margaret S. Swain and Herbert G. Leberhz</i>	35
Heparin Modulates Conformational States of Plasma Fibronectin: An Electron Spin Resonance Spin Label Approach	
<i>Else G. Ankel, Gene Homandberg, Nancy M. Tooney, and Ching-San Lai</i>	50
Comparison of Crude and Affinity Purified Cytosolic Epoxide Hydrolases from Hepatic Tissue of Control and Clofibrate-Fed Mice	
<i>Bruce D. Hammock, Glenn D. Prestwich, Dana N. Loury, Peter Y. K. Cheung, Wai-Si Eng, Sang-Kyu Park, David E. Moody, Marilyn H. Silva, and Roger N. Wixtrom</i>	292

PROTEIN SYNTHESIS AND POST-TRANSLATIONAL PROCESSING

Initial Events Involved in the Synthesis of the Lysosomal Enzyme α -Mannosidase in <i>Dictyostelium discoideum</i>	
<i>James A. Cardelli, Robert C. Mierendorf, Jr., and Randall L. Dimond</i>	338

PROTEOLYSIS AND PROTEIN TURNOVER

Role of Plasma and Serum Proteases in the Degradation of Elastin	
<i>Nadia Romero, Donald Tinker, Dallas Hyde, and Robert B. Rucker</i>	161

REGULATION OF METABOLISM AND OF ENZYME ACTION

- Induction of Succinyl-Coenzyme A:3-Oxoacid Coenzyme A-Transferase during Differentiation of 3T3-L1 Cells
Mahruckh K. Ganapathi, Cindy Raefsky, and Mulchand S. Patel 114
- Phosphorylation Sites and Inactivation of Branched-Chain α -Ketoacid Dehydrogenase Isolated from Rat Heart, Bovine Kidney, and Rabbit Liver, Kidney, Heart, Brain, and Skeletal Muscle
Ralph Paxton, Martha Kuntz, and Robert A. Harris 187
- Effect of Nitrous Oxide Inactivation of Vitamin B₁₂ on the Levels of Folate Coenzymes in Rat Bone Marrow, Kidney, Brain, and Liver
Susan D. Wilson and Donald W. Horne 248
- Regulation of 3-Hydroxy-3-methylglutaryl Coenzyme A Reductase Activity in Human Fibroblasts by Reversible Phosphorylation: Modulation of Enzymatic Activity by Low Density Lipoprotein, Sterols, and Mevalonolactone
Zafarul H. Beg, Diane C. Reznikov, and Joel Avigan 310

NOMENCLATURE ANNOUNCEMENT

- Nomenclature Committee of IUB (NC-IUB) and IUPAC-IUB Joint Commission on Biochemical Nomenclature (JCBN) 393

NUMBER 2, FEBRUARY 1, 1986

COMMUNICATION

- Separation of Dihydropyridine Binding Sites from Cardiac Junctional Sarcoplasmic Reticulum
Neil Brandt and Arthur Bassett 872

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

- The Role of Respiration during Adaptation of the Freshwater Cyanobacterium *Synechococcus* 6311 to Salinity
I. V. Fry, M. Huflejt, W. W. A. Erber, G. A. Peschek, and L. Packer 688
- Mechanism of Gastric Antisecretory Effect of Thiocyanate: Further Evidence for the Thiocyanate-Induced Impediment in Gastric H⁺, K⁺-ATPase Function
Jyotirmoy Nandi and Tushar K. Ray 701
- Respiration-Linked Proton Flux in *Wolinella succinogenes* during Reduction of N-Oxides
James P. Shapleigh and W. J. Payne 711
- Vanadate-Stimulated NADH Oxidation by Xanthine Oxidase: An Intrinsic Property
Lakshmi Khandke, Sharada Gullapalli, Milind S. Patole, and T. Ramasarma 744
- Comparison of Ligninase-I and Peroxidase-M2 from the White-Rot Fungus *Phanerochaete chrysosporium*
Andrzej Paszczyński, Van-Ba Huynh, and Ronald Crawford 753
- An NADH:Quinone Oxidoreductase of the Halotolerant Bacterium Ba₁ Is Specifically Dependent on Sodium Ions
Shifra Ken-Dror, Janos K. Lanyi, Brigitte Schobert, Brian Silver, and Yoram Avi-Dor 761
- Reye's Syndrome: Mitochondrial Swelling and Ca²⁺ Release Induced by Reye's Plasma, Allantoin, and Salicylate
M. E. Martens, C. H. Chang, and C. P. Lee 771

- Sequence of the Radioactive Tryptic Peptide Obtained after Inactivating the F₁-ATPase of the Thermophilic Bacterium PS3 with 5'-*p*-Fluorosulfonylbenzoyl[³H]adenosine at 65°C
David A. Bullough, Masasuke Yoshida, and William S. Allison 865

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

- Enzyme-Substrate Interactions in the Hydrolysis of Peptide Substrates by Thermolysin, Subtilisin BPN', and Proteinase K
D. Brömme, K. Peters, S. Fink, and S. Fittkau 439
- Substrate Specificity and Binding Loci for Inhibitors in an Aminopeptidase Purified from the Plasma Membrane of Midgut Cells of an Insect (*Rhynchosciara americana*) Larva
Clélia Ferreira and Walter R. Terra 478
- Metabolism of Leukotriene E₄ by Rat Tissues: Formation of *N*-Acetyl Leukotriene E₄
Kerstin Bernström and Sven Hammarström 486
- Purification and Characterization of Canine Urinary Kallikrein
Kishore K. Murthy, Oscar A. Carretero, and A. Guillermo Scicli 563
- Origin and Function of the Multiple Extracellular Glucosyltransferase Species from Cultures of a Serotype *c* Strain of *Streptococcus mutans*
Kwame G. Asem, Andrew C. Kenney, and Jeffery A. Cole 607
- In Vitro* Studies of the Mechanism of Inhibition of Rat Liver Uroporphyrinogen Decarboxylase Activity by Ferrous Iron under Anaerobic Conditions
Sudhir K. Mukerji and Neville R. Pimstone 619
- Purification and Properties of Two DNA Ligases from Human Placenta
Ramachandra Bhat and Lawrence Grossman 801

GLYCOPROTEINS AND GLYCOLIPIDS

- Characterization of a Highly Glycosylated Biosynthetic Intermediate of Ovalbumin
Yukinobu Kato, Hitoo Iwase, and Kyoko Hotta 408

HORMONE STRUCTURE AND FUNCTION

- Primary Structure of Chum Salmon Prolactins: Occurrence of Highly Conserved Regions
Akikazu Yasuda, Hiromichi Itoh, and Hiroshi Kawauchi 528
- Isolation and Characterization of Chum Salmon Growth Hormone
Hiroshi Kawauchi, Syunsuke Moriyama, Akikazu Yasuda, Kazuo Yamaguchi, Kunikatsu Shirahata, Junko Kubota, and Tetsuya Hirano 542
- The Role of the Methionine Residues in the Structure and Function of Parathyroid Hormone
Andrew Lawrence Frelinger III and James E. Zull 641
- Characterization and Androgenic Regulation of Soluble Protein Kinases and Protein Phosphorylation in Rat Ventral Prostate Gland
John P. Durham, Fred R. Butcher, T. S. Teoh, Roman Miller, and Michael G. Mawhinney 692

LIPIDS AND PROSTAGLANDINS

- Enzymatic Bases for the Fatty Acid Positioning in Phospholipids of *Brevibacterium ammoniagenes*
Yoshihiro Oh-Hashi, Makoto Inoue, Shigeo Murase, Masako Mizuno, Akihiko Kawaguchi, and Harumi Okuyama 413

Regulation of 3-Hydroxy-3-methylglutaryl Coenzyme A Reductase and Lipid Metabolism in a Concanavalin A-Resistant Chinese Hamster Ovary Cell Line	502
<i>Thor J. Borgford, Robert A. Hurta, David F. Tough, and David N. Burton</i>	
Immunologic and Enzymatic Comparisons between Human and Bovine Lipoprotein Lipase	580
<i>Ira J. Goldberg, William S. Blaner, and DeWitt S. Goodman</i>	
Docosatetraenoic Acid in Endothelial Cells: Formation, Retroconversion to Arachidonic Acid, and Effect on Prostacyclin Production	813
<i>Craig J. Mann, Terry L. Kaduce, Paul H. Figard, and Arthur A. Spector</i>	

MEMBRANES, CELL SURFACES, AND RECEPTORS

Phosphoinositide Phosphorylation and Hydrolysis in Pancreatic Islet Cell Membrane	421
<i>Marjorie E. Dunlop and Willy J. Malaisse</i>	
Transport and Accumulation of Nickel Ions in the Cyanobacterium <i>Anabaena cylindrica</i>	470
<i>Peter M. Campbell and Geoffrey D. Smith</i>	
Ion Diffusion Potentials across Mycoplasma Membranes Determined by a Novel Method Using a Carbocyanine Dye	553
<i>Ulrich Schummer and Hans Gerd Schiefer</i>	
Kinetic Aspects of the Role of Phospholipids in D- β -Hydroxybutyrate Dehydrogenase Activity	662
<i>M'Hamed Saïd El Kebbjaj and Norbert Latruffe</i>	
Involvement of Tyrosyl Residues in the Structure-Function Relationships of D- β -Hydroxybutyrate Dehydrogenase: A Phospholipid-Requiring Enzyme	671
<i>M'Hamed Saïd El Kebbjaj, Yves Gaudemer, and Norbert Latruffe</i>	
Utilization of Membranous Lipid Substrates by Membranous Enzymes: Activation of the Latent Sphingomyelinase of Hen Erythrocyte Membrane	838
<i>Anna Rousseau, Nellie Livni, and Shimon Gatt</i>	

OXYGENASES, MICROSOMES, AND P-450 REACTIONS

Isolation of Rat Intestinal Microsomes: Partial Characterization of Mucosal Cytochrome P-450	492
<i>Pia Lindeskog, Tapio Haaparanta, Maria Norgård, Hans Glaumann, Tiiu Hansson, and Jan-Åke Gustafsson</i>	
Synergistic Induction of Monooxygenase Activity by Glucocorticoids and Polycyclic Aromatic Hydrocarbons in Human Fetal Hepatocytes in Primary Monolayer Culture	650
<i>J. Michael Mathis, Russell A. Prough, and Evan R. Simpson</i>	
Oxygenation of Organosulfur Compounds by Peroxidases: Evidence of an Electron Transfer Mechanism for Lactoperoxidase	677
<i>Daniel R. Doerge</i>	
Female-Predominant Expression of Testosterone 16 α -Hydroxylase ("I"-P-450 _{16α}) and Its Repression in Strain 129/J	855
<i>Mitsuhide Noshiro, Cosette J. Serabjit-Singh, John R. Bend, and Masahiko Negishi</i>	

PHYSICAL BIOCHEMISTRY

Unfolding Pathway of Myoglobin: Molecular Properties of Intermediate Forms	455
<i>Gaetano Irace, Ettore Bismuto, Francesca Savy, and Giovanni Colonna</i>	
Interaction of Several Mono- and Dihydroxybenzene Derivatives of Various Depigmenting Potencies with L-3,4-Dihydroxyphenylalanine-Melanin	84
<i>Julian M. Menter and Isaac Willis</i>	

PLANT BIOCHEMISTRY AND PHOTOSYNTHESIS

<i>In Vitro</i> Synthesis and Assembly of Photosystem II Proteins of Spinach Chloroplasts	
<i>Ei-Ichi Minami, Kenji Shinohara, Tomohiko Kuwabara, and Akira Watanabe</i>	517
Synthesis of Large Subunit of Ribulosebiphosphate Carboxylase by Thylakoid-Bound Polyribosomes from Spinach Chloroplasts	
<i>Tsukaho Hattori and Maurice M. Margulies</i>	630

PROTEIN STRUCTURE AND FUNCTION

Unusual Properties of Crocodilian Ovomacroglobulin Shown in Its Methylamine Treatment and Sulfhydryl Titration	
<i>Hideo Arakawa, Toshiya Osada, and Atsushi Ikai</i>	447
¹ H-NMR Spectroscopic Manifestations of Ligand Binding to the Kringle 4 Domain of Human Plasminogen	
<i>A. De Marco, R. A. Laurson, and M. Llinas</i>	727
Site-Specific Modification of Hemoglobin by Methyl Acetyl Phosphate	
<i>Hiroshi Ueno, Maria A. Pospischil, James M. Manning, and Ronald Kluger</i>	795
Chondronectin Interactions with Proteoglycan	
<i>Hugh H. Varner, Valerie J. Horn, George R. Martin, and A. Tyl Hewitt</i>	824
Properties of Rabbit Liver Glutathione Reductase Reconstituted with FAD Analogs	
<i>Giuliana Zanetti, Cinzia Beretta, and Daniela Malandra</i>	831

REGULATION OF METABOLISM AND OF ENZYME ACTION

Quantitation of Glycogen Synthase and Phosphorylase Protein in Mouse Liver: Correlation between Enzymatic Protein and Enzyme Activity	
<i>William J. Roesler and Ramji L. Khandelwal</i>	397
Deoxyribonucleotide Biosynthesis in Yeast: Assay and Properties of Ribonucleotide Reductase in Permeabilized <i>Saccharomyces cerevisiae</i> Cells	
<i>Manfred Lammers and Hartmut Follmann</i>	430
Purine and Pyridine Nucleotide Production in Human Erythrocytes	
<i>Vanna Micheli, Sylvia Sestini, and Carlo Ricci</i>	454
Differential Sensitivities of the Subunits of Mammalian Ribonucleotide Reductase to Proteases, Sulfhydryl Reagents, and Heat	
<i>Atsushi Sato and Joseph G. Cory</i>	572
Covalent Modification of <i>Escherichia coli</i> ADPglucose Synthetase with 8-Azido Substrate Analogs	
<i>Young Moo Lee, Sampurna Mukherjee, and Jack Preiss</i>	585
Effects of ATP and Monovalent Cations on Mg ²⁺ Inhibition of (Na,K)-ATPase	
<i>Carlos H. Pedemonte and Luis Beaugé</i>	596
Manganese and Manganese-ATP Interactions with Bovine Sperm Adenylate Cyclase	
<i>Meredith A. Brown and Edmund R. Casillas</i>	719
Precocious Induction of Hepatic Glucokinase and Malic Enzyme in Artificially Reared Rat Pups Fed a High-Carbohydrate Diet	
<i>Peter M. Haney, Cindy Raefsky Estrin, Angela Caliendo, and Mulchand S. Patel</i>	787
AUTHOR INDEX FOR VOLUME 244	876

The Subject Index for Volume 244 will appear in the December 1986 issue as part of a cumulative index for the year 1986.

Digitized by the Internet Archive
in 2026

Instructions to Authors¹

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Short Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Short Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors may send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of figures, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50-250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet; footnotes to tables should be identified by superscript lowercase italic letters (^a, ^b, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $\frac{3}{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1980. Please note the following examples.

1. JONES, J. B., DILWORTH, G. L., AND STADTMAN, T. C. (1979) *Arch. Biochem. Biophys.* **195**, 255-260.
2. METZLER, D. E. (1977) *Biochemistry: The Chemical Reaction of Living Cells*, p. 298, Academic Press, New York.
3. HARRINGTON, W. F. (1979) in *The Proteins* (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246-409, Academic Press, New York.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased
